Java, Kotlin, Android Development, Spring Boot, Data Structures, Firebase, Azure Data Studio, Postman, Git, GitHub, GitLab, Bitbucket, Hibernate, HTML, CSS, C Programming

EDUCATION

B.Tech in Computer Science, RGPV – 7.24 CGPA (2021)
12th – RBSE – 80.20% (2017)
10th – RBSE – 83.33% (2015)

CAREER GOAL

Aspiring for Engineer level positions where I can collaborate with professionals and gain expertise in modern technologies for impactful contributions to a reputed organization.

PROFESSIONAL EXPERIENCE

Android Developer | Vidursoft, Ghaziabad | Oct 2023 – Present
- Developing Android apps using Kotlin with clean architecture.
- Managing APIs through Postman and integrating them into apps.
- Handling version control with GitHub, GitLab, and Bitbucket.
- Using Azure Data Studio and Firebase for data handling.
- Responsible for Play Store publishing and maintenance.
- Collaborating across teams for seamless development.

Java Developer | Monoprabal Engineering Services | March 2023 – Sept 2024
- Built responsive UI and real-time food order features using Kotlin.
- Integrated RESTful APIs and Firebase for backend services.
- Used Git for version control and ensured app deployment quality.

PROJECTS

Fodoza – Android Application
- A modern food ordering Android app built using Kotlin.
- Includes restaurant listings, real-time order tracking, and payment integrations.
- Backend services managed with Firebase and API integrations.
- Focused on intuitive UI/UX and smooth user experience.
