Professional Summary

Dynamic Android Developer with over **3 years** of experience in engineering **scalable** and **high-performance** mobile applications utilizing **Kotlin**, **Jetpack Compose** and **MVVM/Clean Architecture**. Expertise in **REST API integration**, **Firebase services**, and **performance optimization** drives successful delivery of production-ready apps. Proven track record includes significant reductions in crash rates and effective management of seamless **CI/CD pipelines** along with **Play Store releases**. Committed to leveraging innovative solutions to enhance user experience and application efficiency.

Technical Skills

- **Languages:** Kotlin
- **Android Frameworks:** Jetpack Compose, XML, MVVM & Clean Architecture
- **Networking & Data:** REST APIs, Retrofit, JSON, Room DB
- **Firebase Services:** Authentication, Firebase, Realtime Database, Cloud Messaging (FCM)
- **Tools & DevOps:** Android Studio, Git, GitHub, Bitbucket, Postman, CI/CD, Google Play Console, Crashlytics

Professional Experience

Android Developer | Vidursoft, Ghaziabad

Oct 2024 – Present

- Utilized Kotlin, Jetpack Compose, and MVVM architecture to develop and deploy Android applications, optimizing **UI rendering capabilities**.
- Executed integration of RESTful APIs via Retrofit and deployed Firebase authentication and Firestore to support efficient **real-time data processing** for active users.
- Analyzed and refined application performance and memory utilization, achieving a notable decrease in **crash incidents** across multiple Android devices.
- Executed comprehensive management of **Google Play Store releases**, focusing on **application versioning** and continuous integration/continuous deployment pipelines.

Android Developer | Monoprabal Engineering, Bhopal

Mar 2023 – Sept 2024

- Developed and maintained enterprise-level Android applications using Kotlin and Java, adhering to strict **MVVM architectural standards**.
- Designed responsive **UI screens**, complex **navigation flows**, and **reusable components**, enhancing overall user retention.
- Integrated Firebase Realtime Database and FCM for real-time data synchronization and targeted push notifications.
- Consumed RESTful APIs using Retrofit and optimized **JSON parsing** algorithms for faster data retrieval and display.

Projects

Selective Matchmaker (Matrimony App) | Android Developer

- Engineered a native Android application using Kotlin and MVVM architecture to handle high-volume user matchmaking.
- Implemented asynchronous API integration using Retrofit and Coroutines to ensure smooth background processing and UI thread efficiency.
- Conducted data validation to maintain 99.9% API reliability and secure user data handling.

Brio Fitness App (BLE Integration) | Android Developer

- Developed a smart fitness application with complex Bluetooth Low Energy (**BLE**) integration for custom hardware devices.
- Architected the connection layer to simultaneously manage and sync multiple smart devices, including skipping ropes, smart scales, and measuring tools.
- Implemented **real-time data parsing** and **data visualization charts** for dynamic user fitness tracking.

EasiApp (B2B & B2C Telecom App) | Android Developer

- Developed and maintained dual Android applications (Dealer and Customer) utilizing **Kotlin** and **MVVM architecture** to serve both **B2B** and **B2C** market segments.
- Engineered secure, end-to-end workflows for **RICA** compliance and seamless **SIM** card purchasing, ensuring strict **data validation** and **secure API communication**.
- Integrated multiple third-party **REST APIs** to facilitate **real-time utility transactions**, enabling users to perform **electricity**, **fibre**, and **mobile recharges** within a unified platform.
- Optimized state management and navigation flows across both apps, resulting in a streamlined transaction process and a reduction in booking/purchase drop-offs.

Education

Bachelor of Technology | Rajiv Gandhi Proudhyogiki Vishwavidyalaya (RGPV), Bhopal

2017 - 2021

CGPA: 7.24
